

## Point Bush Ecological Restoration Trust

The Point Bush Ecosanctuary is a free community asset located in Waimate for all to enjoy.

The mission of this Trust is to establish an EcoSanctuary in Waimate on 90ha of land donated by Mr and Mrs Dennison for the preservation of existing native flora and fauna as well as the planting and regeneration of a native forest reserve over the entire Trust area in perpetuity with a particular focus on environmental protection and enhancement, fostering environmental education and awareness in the community along with protecting established walking and MTB.

With the ever-increasing Wallaby numbers in the area, the Trust aimed to establish a predator proof perimeter fence, protecting the EcoSanctuary area from pests and predators as a mission critical first stage of the Project in line with the Government Predator Free 2050 policy.

The Community Trust of Mid & South Canterbury granted \$60,000 in Main Round 1 2020-21 towards the predator proof fence.
